1. Acting/DCI Address to Employees

On 8 January 1987, Mr. Gates addressed Agency employees on two items of intense interest and concern as follows:

DCI's HEALTH - Mr. Casey's condition remains stable and continues to improve steadily after surgery on 18 December to remove a lymphoma which, by definition, is cancerous, from the left side of his brain. The DCI is fully alert and conscious of everything going on. The team of doctors treating the DCI remain optimistic about his recovery, which will clearly take time. Mr. Gates stated that despite speculation in the media to the contrary, the President is not considering a replacement for Mr. Casey.

A copy of Mr. Gates address has been published and is being distributed for review by domestic and overseas employees.
